

Farm Wholesale Twin-Wall Harvesting Totes

Innovative design allows you to pick, process, hydro-cool, transport, and display—all in the same tote.

Farm Wholesale Harvesting Totes are designed to protect your produce by minimizing bruising caused by the transfer of produce from container to container. Custom designs are cost effective even for short runs—no cost-prohibitive injection molds required. Available in several sizes, or customize a tote for your application.

Features:

- Hydro-cool directly in totes
- Twin-wall polypropylene cushions to reduce bruising
- Extremely durable—years of use
- Wire reinforced handles—attach to harness
- Sonic-welded seams
- Easy to clean
- Insulated plastic keeps produce fresher
- Stackable and Nestable styles
- Lightweight for ease of use
- Impervious to moisture
- Mildew and chemical resistant
- UV inhibitor
- Made in the USA
